

Klettergarten Seekopf Süd

CLIMBING WALL/FIXED ROPE ROUTE

📍 Schattenlagant, 6708 Brand

Climbing area Seekopf-Süd with access from the top station of the Lünarseebahn

Very well equipped climbing area in alpine surroundings. Rough rock, good protection and south exposure.

A few years ago a great climbing garden was created in the Seekopf south face halfway to the Totalphütte. The rock is rough, grippy and offers all kinds of climbing for at least one day. If you have more time, you can train your climbing here for the long climbing routes at the Hüttenkopf next to the Totalphütte.

All routes were established by Toni Schallert in 2014-2015 and are well secured and posted.
